SAND CASTING

2m min. 1 kg max. 2 to.

SAND CASTING

5m min. 10 kg max. 50 to.

LBI foundry and machine shop originally made its reputation on the service we provided to local companies in Europe. Today, our group **LBI Foundries** retains this philosophy of providing high quality service and fulfilling our customers' casting and machining needs all over the world. This is achieved through well-targeted technical and commercial offers in order to optimize costs and provide innovative technical solutions.

Since 1919, the range of high-quality centrifugal castings produced by LBI Foundries has been continually expanded. After the centrifugal casting of bronze parts, LBI then started producing parts made in stainless steels and Aluminum for the most demanding applications and customers. In addition, **LBI's** sand casting subsidiaries (**SRI** and **INOXYDA** companies) bring their specific know-how for the sandcasting of copper-based alloys, therefore completing a rich portfolio and enabling the group **LBI Foundries** to offer a One-Stop-Shop solution for castings and machining to a wide variety of industrial sectors.

Each company of LBI Foundries is certified by the quality management system ISO 9001

 **5 PRODUCTION SITES**

 **50 M€ TURNOVER / 60% EXPORT**

 **350 EMPLOYEES**

Main applications:

SHIPBUILDING: Flanged liners, bearing housings, propulsion shaft liners, rudder stock liners, hubs, CPP or FPP blades

ELECTRICAL APPLICATIONS: Sliprings, circuit breakers rings, electrical connections, arms for welding guns

PUMPS: Pump housings, shafts, liners, sealings, covers

HYDRO POWER & TURBINES: Impellers (Francis, Pelton, Kaplan), sealing, labyrinth rings

VALVES: Housing, gates for butterfly valves, valve bodies

And much more:
