

CENTRIFUGAL CASTING

Stainless & heat resisting steels
Copper based alloys - Aluminium alloys

CEMENT AND MINING INDUSTRIES

Serving your Industry with Centrifugal Castings

**BUSHING FOR GYRATORY CRUSHERS
FINISH MACHINED**

Material : 15% Leaded Bronze

**HALF BEARING FOR SUPPORT ROLLERS
FOR ROTARY KILNS**

Material : 10% Leaded Bronze

**SEGMENT LINERS
FOR GRINDING MILLS
BEFORE AND AFTER
SPLITTING**

Material : 15% Leaded Bronze

**FEEDING TUBES
FOR NICKEL
PROCESSING
FURNACES**

Material : Nickel Super Alloy

**Please contact us
for more specific products!**

CENTRIFUGAL CASTINGS FOR CEMENT AND MINING INDUSTRIES

Materials

- Bronzes (Leaded Bronze, Tin Bronze, etc.)
- Brasses
- Aluminium Bronzes
- Aluminium Alloys
- Stainless Steels
- Special Alloys

Condition

Proof machined or finish machined as per drawing

Sizes

- Large range of dimensions
- OD: from 60 mm up to 6000 mm
- Length: 4.5 m maximum
- Cast weight up to 20T

Advantages of centrifugal casting

- Dimensional stability
- Excellent machinability
- High mechanical properties
- Improved corrosion resistance

Main approval

- TÜV ISO 9001

Main references

- FL Smidth
- Outotec
- Metso
- Holcim
- Krupp
- Fives FCB
